

Stainless Steel Sheet & Coil Parcel — 17.2 Tonnes

AISI 304, 304L & 316L | 344 sheets + 2 coils | Taiwanese mill product, imported March 2026

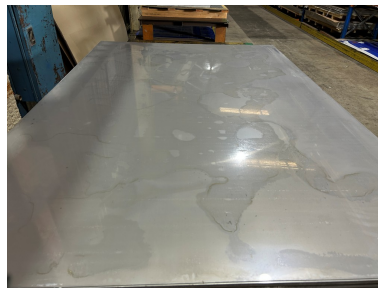

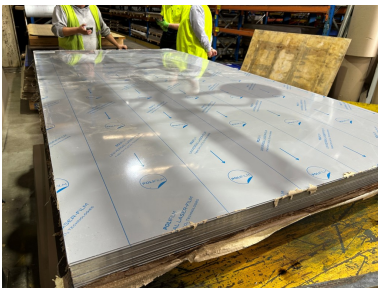

Auction Warehouse offers for immediate sale a substantial parcel of cold rolled stainless steel sheet and coil, produced by a Taiwanese mill and imported for distribution into the Australian market. The consignment encountered heavy weather on the voyage and sustained salt water exposure; it was rejected by the receiving distributor, whose trade requires blemish-free first-quality stock. The majority of lines carry protective laser PE film on the main face, which has substantially shielded the working surfaces — damage presents principally as water staining to unprotected faces, edges and packaging. This is a working parcel of laser-grade stainless at a fraction of replacement, suited to fabricators and processors for whom the affected surfaces are workable, concealed or refinished.

Parcel Summary

Grade group	Net weight	Content
AISI 304 / 304L	12.64 tonnes	330 sheets across ten size/finish lines — 2B, 2B paper-interleaved, 2B laser PE, and No.4 brushed laser PE
AISI 316L	4.56 tonnes	46 sheets (2B laser PE) plus 2 slit coils, 0.55 mm × 1219 mm (975 kg each)
TOTAL	17.196 tonnes	344 sheets + 2 coils on 14 timber skids, ex 20' container

Condition

Salt water exposure in transit. Observed condition: water staining and mineral marking to exposed sheet faces, with pooled-water marks on top sheets of opened packs; timber cases and interleaving paper wet with isolated rust transfer marks from packaging; protective laser film intact across the majority of main faces, with clean bright material evident beneath. Sheets are flat and undamaged mechanically; coils remain strapped in timber transport frames. Offered strictly as-is, where-is — inspection invited and recommended. Grade and finish per the mill's commercial documentation; mill certificates available on request.

Laser film intact on main faces | typical water staining, exposed face | cases as stored

opened packs, protective wrap disturbed | pack corners, film-edged sheets | coil unwrapped for survey

Inventory — As Per Mill Packing List

Grade / Finish	Size (mm)	Pcs	Net kg
316L 2B, PE film — SLIT COIL	0.55 × 1219 × coil	2 coils	1,950
304 2B	1.50 × 1219 × 1828	50	1,308
304 2B	1.50 × 1219 × 2438	37	1,292
304 2B	2.00 × 1219 × 2794	23	1,240
304 2B	3.00 × 1219 × 2438	18	1,258
304 2B, paper interleaved	1.50 × 1219 × 2438	37	1,296
304L 2B, laser PE film	4.00 × 1219 × 2438	13	1,208
304 No.4 brushed, fibre laser PE film	0.90 × 1219 × 2438	62	1,292
316L 2B, fibre laser PE film	2.00 × 1219 × 2438	27	1,252
316L 2B, fibre laser PE film	2.00 × 1500 × 3000	19	1,353
304 2B, fibre laser PE film	2.00 × 1219 × 2438	26	1,231
304 2B, fibre laser PE film	3.00 × 1219 × 2438	18	1,260
304 2B, fibre laser PE film	3.00 × 1500 × 3000	12	1,256
TOTAL		344 + 2 coils	17,196

Quantities and weights per mill packing list; subject to on-site verification. Sheet marking traceability visible on stock. Standard sheet sizes (1219 × 2438 and 1500 × 3000) dominate the parcel — immediately usable in any laser or guillotine shop.

Applications & Buyers

The mix reads like a fabricator's standing order: 0.9 mm No.4 brushed for splashbacks, benchtops and food equipment cladding; 1.5–3.0 mm 2B laser-film stock for laser cutting, tanks, guards, chutes and general fabrication; 4.0 mm 304L for welded and structural work; and 316L sheet and slit coil for marine, coastal and chemical-exposure applications. Natural buyers include laser cutting job shops, kitchen and food equipment manufacturers, tank and vessel fabricators, marine and architectural metalworkers, and secondary stainless traders. For most of these uses the affected faces are concealed, welded over, or refinished as a matter of course.

WHOLE PARCEL — OFFERS OVER \$32,500 + GST

Replacement value of this parcel exceeds AUD \$70,000 landed. Offered to clear in one line; grade-group lots (304 / 316L) considered at the seller's discretion. Sold as-is, where-is. Buyer collects — goods on 14 timber skids, forklift loading available; cartage can be arranged at buyer's cost. Payment prior to release. All offers subject to insurer approval.

316L slit coil in transport frame | pack edge showing traceability marking and paper staining | staining to unprotected face

Inspection & Offers

Inspection by appointment. Full photo set, packing list and mill documentation on request. Offers to Les Louisson, 0432 271 745 or les@louissonandco.com.au. Early offers advised — stainless salvage of this grade mix moves quickly.
